**Protecting Cultural  
Heritage**

A photograph showing two workers in white hard hats and high-visibility yellow safety vests working on a large, ancient mosaic. One worker is kneeling on a wooden platform, pointing at the mosaic, while the other stands and uses a tool to work on the upper part of the mosaic. The mosaic depicts a figure in a long, flowing robe. The background shows the ornate, arched ceiling of a building with decorative moldings.

Build climate resilience and  
develop your strategy to protect  
cultural heritage.

# Climate Resilience Resources for Cultural Heritage

CRR helps cultural institutions and heritage  
sites prepare for and mitigate climate-related  
environmental hazards.

## Climate Resilience Resources for Cultural Heritage

Visit [resilience.culturalheritage.org](https://resilience.culturalheritage.org) for:

- a step-by-step guide to developing a resilience strategy, available in English and Spanish
- an interactive mapping tool to explore the risk of current and future climate hazards
- information on forming and sustaining community learning groups

CRR is made possible in part by the National Endowment for the Humanities.
